

EXTERNAL POWER SUPPLY

24V DC - 2A

| OVERVIEW |

The External Power Supply is for use when the number of sensors and remote displays exceeds the current demand available directly from the Flamefast BoilerGuard or GasMonitor panel.

The pluggable terminal block provided with the PS-24D, allows it to be connected directly into the Flamefast panels, so wiring for larger systems is kept clean and simple, with no concerns over ground referencing for the BACnet interface.

DIMENSIONS

Height	180mm
Width	130mm
Depth	60mm

TECHNICAL SPECIFICATION

Power Supply	100 - 250VAC 50/60Hz
Power Output	24V DC (2A)
IP Rating	IP66
Housing Material	PC
Colour	Light Grey (RAL7035)
Approval	CE, UKCA

PART NUMBERS & COMMON ACCESSORIES

PART NO	DESCRIPTION
PS-24D	24V DC Power Supply (2A)
