

# PRESSURE TRANSMITTER HEAT SINK

## | OVERVIEW |

The Pressure Transmitter Heat Sink provides a robust, low-cost solution for line cooling where the media temperature exceeds the transmitter rating, without the need of copper coils that can be easily damaged, and with a full 316L Stainless Steel body, material compatibility is not an issue.

## TECHNICAL SPECIFICATION

Power Supply	12-32V DC
Body Length	108mm
Max Pressure	400 Bar
Max Temp	250°C
Typ. Temp Dissipation	50°C in Ambient
Process Connection A	G1/4" Male (BSPP)
Process Connection B	G1/4" Female (BSPP)
Wetted Parts	Stainless Steel (316L)

## PART NUMBERS & COMMON ACCESSORIES

PART NO	DESCRIPTION
PT-HS	Pressure Transmitter Heat Sink
