

# PRESSURE TRANSMITTER

## | OVERVIEW |

The Flamefast Pressure Transmitter is an extremely compact unit designed for use with the GasGuard, ServiceGuard and BoilerGuard for low pressure Natural Gas or LPG applications.

When screwed directly into the downstream port of a gas solenoid valve and wired back to the panel with a 3 core cable, the transmitter provides an accurate pressure reading used to monitor for leaks, low pressure as well as overpressure.

## Technical Specification

Power Supply	24V DC $\pm$ 10%
Analogue Output	1-5V
Cable Length	1M
Connection	1/4" Male BSP
Approval	CE, UKCA

## Part Numbers & Options/Accessories

Part No	Description
PT00	Pressure Transmitter - 100mB
PT10	Pressure Transmitter - 10Bar

HIGH PRESSURE GAS PROVING AVAILABLE ON REQUEST
